Season's Greetings

from
ANU Library,
Archives & Press
Thank you for
your support
in 2019

We wish you all the best
for 2020

SIS News

Thank you everyone

A fantastic year of successful service delivery and great developments that have both helped our patrons and communicated ANU's research to the world more effectively than ever before.

Well done everybody.

Do enjoy the break and come back refreshed for a new exciting year.

Changes in Research Training. The Unit name has changed from Research Skills and Training to **"Researcher Development"** – their email address is now email address researcherdevelopment@anu.edu.au. The monthly HDR Update will change to "ANU Researcher" from February 2020.

Academic Board. The Academic Board Newsletter for Meeting 6/2019 on held on 3 December 2019 is now available on the ANU News Site.

Prof Jacqui Lo is finishing her term as Chair as she is moving to the University of Adelaide – let me say what a wonderful chair she has been for 2 terms – leading discussion on strategic issues, delivering the ANU Statement on Freedom of Expression 2019, ANU Statement on Academic Freedom 2018, ANU Student Partnership Agreement 2019 and maintaining a light on ensuring academic standards of the highest quality.

Digitisation Update. The wonderful team, with great assistance from staff across the Division including our two terrific interns Cherie and Finn, has opened up access to an amazing range of resources – the latest newsletter highlights Climate Records from 1882 to 1955 from Fiji and Australia, Pacific slides. A team effort that has helped to attract a husband) from 1934, 13 issues of A Voz de Timor, Diary of R McGregor Watson and A series of photographs from the Raymond O'Dea collection showing Sydney journalists during the 1967 period.

The Deck. Amazing successful activities led by the wonderful Jason. 7 great new session brought insights and capability building around digital educational support through The Deck program – EDUCE060 Active Learning, What IS Text and Data Mining?, Managing Your Digital Footprint, Text and Data Mining with JSTOR, Mobilizing your Learning - tools and tips, Video Consulting using ZOOM. Build your own Multimedia eBook. One was so heavily booked it had to move to the Marie Reay Building!

CAUL

- Merry Christmas from CAUL – please note the office is closed until Monday 6 January 2020

Copyright.

- The Australian Digital Alliance (ADA) welcomes the government's decision not to take up the ACCC's recommendation for a mandatory copyright takedown code for digital platforms, which would have imposed unnecessary legal burdens on Australia's technology sector. They agree with the government that the ACCC recommendation, from the final report of its Digital Platform Inquiry, would have had unintended effects for our complex copyright ecosystem, impacting on many groups beyond the digital platforms it purported to regulate.

Cengage McGraw Hill Merger. ANU together with many others made a formal mission into the Australian Competition and Consumer Commission's (ACCC) review of Cengage's proposed merger with McGraw-Hill. The ACCC has released a Statement of Issues (SIO) in relation to this proposed merger. You can find the media release here. They are now seeking comments on the preliminary concerns in relation to higher education publishing and authors' rights in Australia. Further information is available on the ACCC's website.

Elsevier. And a final development in relation to Elsevier – how could we not end the year without an Elsevier story? Elsevier has announced a new Read & Publish agreement with the Bibsam Consortium which represents Sweden's National Library, universities and research institutes. It means Swedish researchers will have access to the scientific publisher's 2000 journals again. The agreements includes the open access publishing of all Swedish research articles. Couperin, the French academic consortium for higher education & research and Elsevier, have signed a new 4-year national licence agreement to provide researchers at universities and research institutions across France with perpetual access to the publisher's content provided through ScienceDirect.

SIS Planning Day
DATE: 3 February 2020
VENUE: Graneek Room

FROM HR

The Human Resources Division is excited to announce that the ANU Staff Training Calendar for 2020 is now available.

The University is committed to a culture of continuous learning and development.

We have refreshed the staff training calendar for 2020, to support you and your staff and teams. Based on feedback from the University community, we have added several new workshops, including a collection which is specifically tailored for staff with supervisory responsibilities.

We encourage all staff to reflect on their development needs and priorities for the year ahead using the training calendar and in discussion with their supervisor.

To support the University's strategic commitment to Equity & Diversity, we are offering LGBTIQ+ ALLY training and Indigenous Cultural Awareness training at a subsidised rate for all staff. In addition, recognising that some staff access flexible working arrangements, several half-day courses are available.

Our new workshop topics include:

- Cultural capability
- Inclusive leadership
- Lead and manage effective workplace relationships
- Building mental toughness and peak performance under pressure
- Introduction to AGILE Project Management
- Influence and negotiate
- Managing up
- Introduction to Emotional Intelligence (EI)
- Mental Health First Aid –
- Engaging leaders
- Occupational First Aid

The calendar can be accessed here to view programs in detail.

Should you have any questions about staff training and development at ANU, please contact the Human Resources Division, Culture and Development team by email: HRDDevelopment@anu.edu.au.

Best wishes

Nadine

Possible executive order on open access. There has been a lot of rumour and stories on this topic. Educgs-reported "Academic publishers are worried about an executive order the Trump administration is considering that would impose new open access requirements on federally funded research. The possibility of a mandate drawn much federally funded research. The possibility of a mandate drawn much letters from scientific societies and academic associations expressed concern about a requirement for publishers to "immediately make federally funded scientific discoveries published in their journals freely available to the global market." On December 18, a Scholarly Kitchen post explored how previous open access requirements have impacted research and publishing and suggests that the order stems from the US Office of Science and Technology Policy". And last publishers are protesting - see the letter from more than 135 organization led by the Association of American Publishers!

Open Textbook Pilot grant program. The U.S. House has voted to approve a broad bipartisan budget bill that includes renewed funding for the Open Textbook Pilot grant program—at an increased level of $7 million for Fiscal Year 2020! That's $2 million more than last year and a resounding endorsement of the program's benefits for students. The report language accompanying the bill also directs the Department of Education to provide a longer application period, public notice and comment procedures, and strong open licensing requirements.

Predatory journals: no definition, no defence. Leading scholars and publishers from ten countries have agreed a definition of predatory publishing that can protect scholarship. It took 12 hours of discussion, 18 questions and 3 rounds to reach. The consensus definition reached was: "Predatory journals and publishers are entities that prioritize self-interest at the expense of scholarship and are characterized by false or misleading information, deviation from best editorial and publication practices, a lack of transparency, and/or the use of aggressive and indiscriminate solicitation practices."

Organizing Support for Student Success. Shala S-H's research examined how academic and student support services at community colleges are organized, funded, and staffed, and how these services can most effectively advance student success. The report shares findings from a survey of chief academic and student affairs officers across hundreds of not-for-profit colleges serving two-year students. It provides new information about how student support, organization, graduation, and course completion as the most important objectives to their college as well as to the services under their own leadership. As they look across campus units, they specifically value the library for its role in providing students with access to technology, resources, and spaces.

Responsible Operations: Data Science, Machine Learning, and AI in Libraries. Thomas Padilla has written this to help chart library community engagement with data science, machine learning, and artificial intelligence (AI). It was developed in partnership with an advisory group and a landscape group comprised of more than 70 librarians and professionals from universities, libraries, museums, archives, and other organizations. Areas in the report include

1. Committing to Responsible Operations
2. Description and Discovery
3. Shared Methods and Data
4. Machine-Actionable Collections
5. Workforce Development
6. Data Science Services
7. Sustaining Interprofessional and Interdisciplinary Collaboration

Journal of Librarianship and Scholarly Communication.

The latest issue includes:

- Creating a Library Publishing Program for Scholarly Books: Four Options Are Limited (Kevin Hawkins)
- Whose Research is it Anyway? Academic Social Networks Versus Institutional Repositories (Nicole C. Eva and Talia A. Chung)
- When a Repository Is Not Enough: Redesigning an OJS Platform to Promote an Integrated Economy to Serve the Research Community (Robert P. Sewell, Sarah Pigg, Pauline Melgoza, James S. Doss-Gollin, Kristi Thompson, Huff, Gregory T. Bailey, John Bordovsky, Sean Buckner, Anton Sala Fernandez, Lisa Foncille, Julie Mosbo Ballestro, Ian W. Muise, and Brian J. Wright)
- Opening Up Open Access Institutional Repositories to Demonstrate Value: Two Universities' Pilots on Including Metadata-Only Records (Ellen Dubinsky, Leah Morin, and Melanie T. Warner)

OCLC survey on discovery and fulfillment. Lynn Silipigni Conneway writes: "How do library users navigate their paths from an initial point-of-need to the final moment of getting the resources they require? That process can be as fast as a single search and one click, or it may encompass many stops and starts, false trails, frustrations, and wrong turns. Understanding and improving those paths is among the most important work we do, so I was thrilled when the OCLC Global Council of New Directions in Fulfillment' as its focus area for 2020.
