

Bush week sessions on Zoom - Frieda had 23 attend her Menzies session listening intently

SIS News

COVID 19

Semester 2. Next week semester 2 commences and we will see some changes, based on the University's current planning. You can find the overarching framework here.

From Return to Campus Taskforce.

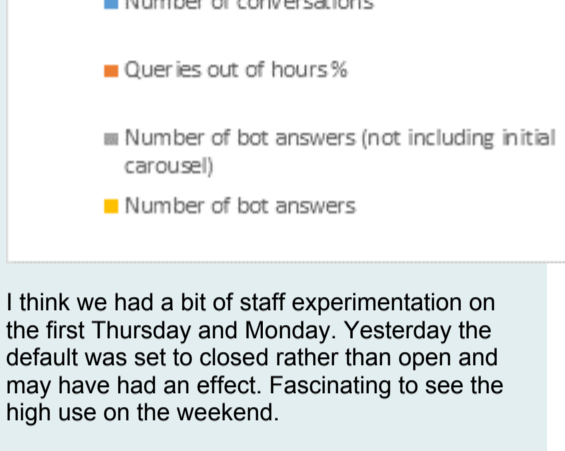

Please be advised that Facilities & Services continue to provide Whiteley Industries Viraclean (listed on link below) as disinfectant to local areas. It is a local area responsibility to ensure that your stock is maintained by contacting F&S as required. This link lists the current disinfectants on the Australian Register of Therapeutic Goods (ARTG) for use against COVID-19. It is important to note that claims that a disinfectant has an effect against any virus must be expressly permitted by the TGA before being used in consumer advertising (including on the label).

OCLC COVID-19 REALM project.

OCLC's project with Battelle has provided very useful information - the latest test results cover (1) Braille paper pages* (2) Glossy paper pages** (3) Magazine pages** (4) Children's board book** (5) Archival folders***.

Public Libraries in Europe and COVID-19. The National Authorities on Public Libraries in Europe (NAPLE) have released updated findings from 22 European countries regarding the way that COVID-19 affected public library services up until July 2020. The new report summarises how public libraries responded to the challenge of the virus with a focus on re-opening strategies and approaches; quarantining of books and other health and safety measures; and other issues that have emerged over the last two months.

Library chat bot. Some interesting use in its first week:

I think we had a bit of staff experimentation on the first Thursday and Monday. Yesterday the default was set to closed rather than open and may have had an effect. Fascinating to see the high use on the weekend.

Most asked questions:

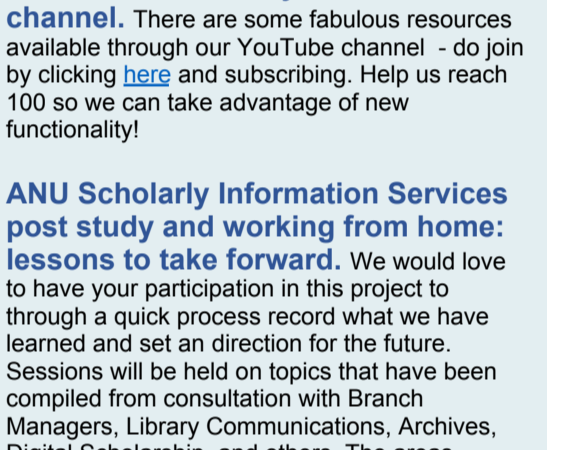

- Library opening hours
Online resources
Booking study rooms
Subject guides
Library branches

Thank you to everyone who contributed.

Copyright.

- Jessica Coates has been appointed as Senior Advisor, Rights Management for the National Library, and so will be leaving the ADA and ALCC

SIS: contributing to a world class university. You can find highlights of our contribution to the university during the COVID-19 working and study from home period and our highlights in terms of services in a new poster here. Thanks to everyone for the work that makes a fabulous contribution to the university and Michelle and Nic for the work on the poster.

Join the ANU Library YouTube channel. There are some fabulous resources available through our YouTube channel - do join by clicking here and subscribing. Help us reach 100 so we can take advantage of new functionality!

ANU Scholarly Information Services post study and working from home: lessons to take forward.

We would love to have your participation in this project to through a quick process record what we have learned and set a direction for the future. Sessions will be held on topics that have been compiled from consultation with Branch Managers, Library Communications, Archives, Digital Scholarship, and others. The areas identified for training are:

- Digital training
Collections - a hybrid world with a digital access focus
Digital discovery - systems we have and areas of success, as well as potential improvement
Communication and promotion of our services
Collaboration between our areas and with other areas in the university
Workflows and streamlining processes for acquisition of resources - library, archives, records, repository,
Digital transformation
Our users - what worked and what do they expect of us (design thinking workshop).

Please nominate for sessions (we'll be using a knowledge care methodology) and contact Margaret Prescott with your preferred sessions.

New on the intranet/SIS/Library website.

The RDM presentation slides and manual are now current with the International CCBY4.0 licence

Privacy/data protection.

- EDPS Statement following the Court of Justice ruling in Case C-311/18 Data Protection Commissioner v Facebook Ireland Ltd and Maximilian Schrems ("Schrems II"). EDPS welcomes "that the Court of Justice of the European Union, in its landmark Grand Chamber judgment of 16 July 2020, reaffirmed the importance of maintaining a high level of protection of personal data transferred from the European Union to third countries...EDPS trusts that the United States will deploy all possible efforts and means to move towards a comprehensive data protection and privacy legal framework, which genuinely meets the requirements for adequate safeguards reaffirmed by the Court".

HISTORY. Some insights into perceptions about libraries from the past.

You are aware that the Public Library is now opened for general use. It is not, however, available to a very large portion of those who would most appreciate its advantages. I mean the young gentlemen engaged in the public services, the banks, and the merchants' counting houses, as it is closed in the evening, which is the only time this numerous class of readers can find time leisure to avail themselves of its advantages. It is, however, understood that it will be opened in the evening, as soon arrangements are made to have it lighted with gas. This will be a great improvement, by enlarging the sphere of its usefulness, and affording accommodation to a class of persons, whom it is of the greatest importance to remove from the temptations of far less respectable recreations. Bendigo Advertiser Thu 21 Feb 1856 Page 2

The Public Library has been thrown open to the public at night - a luxury fully appreciated by many, and which it is to be hoped, will have the happy effect of improving the tastes of the working classes Mount Alexander Mail Fri 30 May 1856 Page 4

Selling reproductions from digitised library collections. This week an academic intended a reproduction of a library item that had been digitised which was being sold online. There are a large number of reproductions being sold by the bookseller - from the ANU Library, Kyoto University's Amabe digitisation project and Harvard Yenching digitised items as well as many others from another library. This raises interesting questions of whether those purchasing the materials understand that they are reproductions, the nature of opening up knowledge through commercial resellers, digital rights and the nature of commercialisation of content beyond the traditional means of selling and reselling. Thanks to Friederike and Tom for the analytic work and Ben Penny and Nathan Woolley for identifying this

Roxanne Missingham University Librarian

Events

ALIA Chats 'after work drinks', virtually...

Time: every Friday 5pm AEST for at least 40 minutes - sometimes we add several extra sessions to account for people's availability, and a 7pm AEST session for our WA friends.

LINK: A Zoom link is emailed each Thursday to ALIA Members. Let me know if you'd like the link - we are corporate members.

Open Access Scholarship Publishers Association Conference

When? 21 - 24 September 2020
Where? Online

Reminder regarding personal electrical appliances

- Do not use personal electrical appliances/equipment unless they are first inspected, tested and tagged, deemed safe for use and are still in the valid period of electrical testing;
Do not use an electrical appliance/equipment/plant/item if it is damaged in any way;
Do not use an electrical appliance/equipment/plant/item if it is discoloured;
Do not use an electrical appliance/equipment/plant/item if it is overdue for electrical testing and tagging;
Do not use any item that has been RED TAGGED and do not remove red tags;
Do not use a double adaptor. Only use power boards with an overload protection;
Do not use any travel adaptors. Australian leads are available to swap out international plugs.
Do not attempt to modify any electrical equipment; AND
All staff and students are required to conduct visual inspections before each use of any electrical appliance/equipment/plant/item whether owned by the University or by themselves;

NOTE: 90% of items that fail their electrical test, fail on the initial visual inspection. If the item looks damaged or with defects or if there are any concerns, STOP and get it checked out with your Test and Tag Officer

Submit an EOL to create or develop high quality data collections that are national in scale, to support leading edge research (publications, grants, impact, science priorities). Read More.

ANU Press and Open Access Publishing

cOAlitionS - new controversy about author rights. T

Rick Anderson reviews the latest Plan S announcement and comments "Though billed misleadingly by cOAlition S as a plan "to safeguard researchers' intellectual ownership rights," both the purpose and the effect of this expanded strategy remain - as has always been the case with Plan S publishing requirements - to take intellectual ownership rights away from authors, transferring them to the general public (rather than to publishers)". -> read more

European Research Council calls for OA plans to respect researchers needs.

The ERC Scientific Council is committed to implementing full and immediate Open Access and continues to support the principles underlying Plan S. Members of the ERC Scientific Council are participating constructively in various activities aimed at making Open Access a reality. However, during the past six months, the ERC Scientific Council has intensified its internal debate and reached a unanimous decision to follow a path towards Open Access implementation that is independent of cOAlition S activities. Therefore it has decided to withdraw as a supporter of cOAlition S -> read more

Open Educational Resources. The Canadian Association of Research Libraries has issued a new call and set of resources on OERs.

"As higher education continues to prioritize remote online instruction in the context of the COVID-19 pandemic, university libraries are working with others to advance, innovate and collaborate on the creation and use of high-quality open education resources. In recognition and support of the work of academic libraries, centres for teaching and learning, and faculty members leading the development of OER on campuses across the country and around the world, CARL's Open Education Working Group is pleased to share the following resources: an FAQ on Open Education, guidance for instructors on Getting Started with OER, and an Environmental Scan of Open Education Service and Support in Canada". -> read more

Libraries and Sustainability. ALA has released a Dewey Decibel Podcast on Libraries and Sustainability. In Episode 52, Dewey Decibel talks with librarians who are implementing sustainable practices in both their libraries and their lives. -> read more

Canadian (CARL) Investments in Open Scholarship.

The Canadian Association of Research Libraries (CARL) has released a report detailing its academic member institutions' financial contributions to the development and sustainability of the infrastructure and services that underlie open scholarship. One of the survey's main findings is that the total, aggregate spending on open by the 28 responding libraries during the 2018-2019 fiscal year was \$23 million CAD, with an average spend per institution of \$827,086. Individual libraries spent between 0.88% to 7.23% of their total budget on open scholarship (average of 3.09%). -> read more

In Conversation with Thomas Padilla.

AI4LAM is an international community and participatory community focused on advancing the use of artificial intelligence in, for and by libraries, archives and museums. Their webinar "In Conversation with Thomas Padilla" hosted by Alexis Tindall (University of Adelaide Library) and Adam Moriarty (Auckland War Memorial Museum) covered many issues. Watch the video to share the experience. -> read more
