AI – Changing our future

10:45-11:15

Symposium 2024
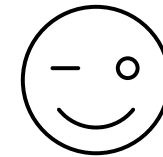

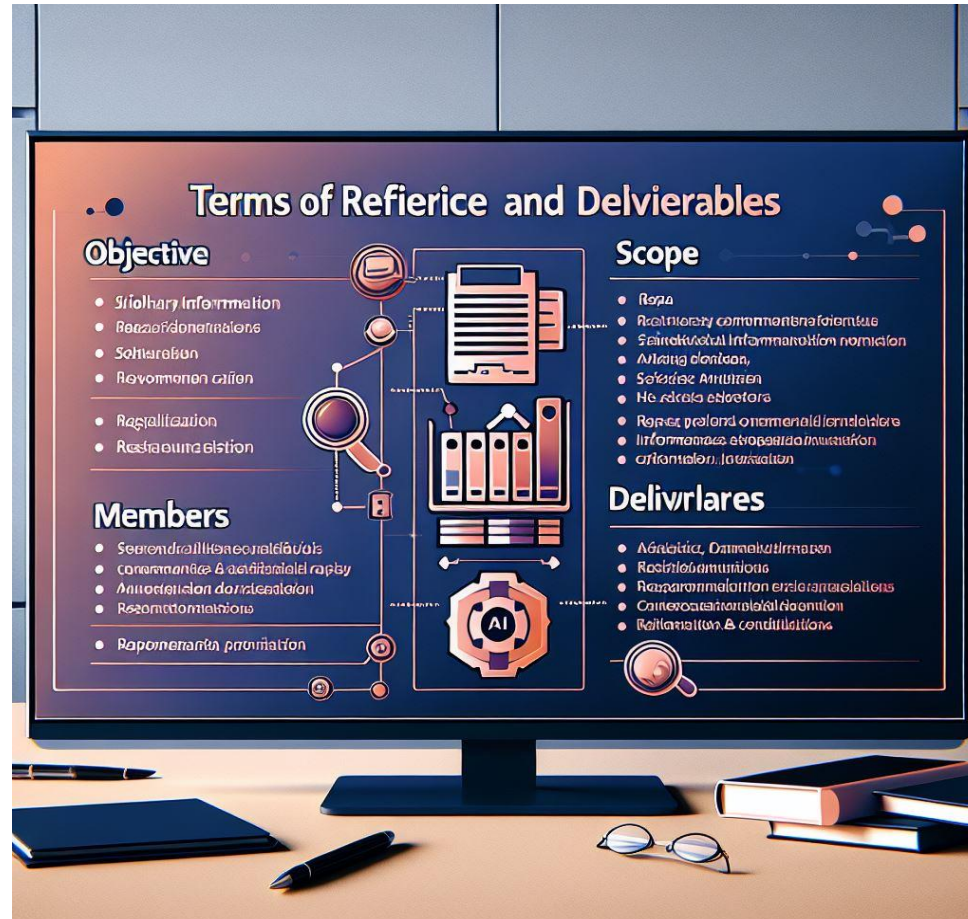

Scholarly Information Services AI Working Group

The Working Group has been focused on:

- How AI can be used supporting students in the education space but also how can that be incorporated as resources in the Library to support teaching and learning more broadly.

- What principals or frameworks do we need to support the Data Governance and Privacy areas.

- Transformative AI - Maximizing or making our Library and archives collections more successful, accessible and engaging using new technologies.

The Group will arrange a presentation on the work for SIS staff.
Contacts: Alex Caughey Hutt or Megan Easton
